PERFORMANCE INFORMATION

The information in this table focuses on the performance of investment options that do not have a fixed or stated rate of return. It shows how these investments have performed in the past and allows you to compare them with appropriate benchmarks for the same time periods. Information about an option's principal risks is available through the following website, mylife.jhrps.com/investment_info. Please enter code "WE1302" to view your plan investment option details.

Total returns include changes in share price and reinvestment of all dividends and capital gains, if any, but not the effect of any sales charges, which are waived for qualified retirement plans. If sales charges were included, total returns would be lower.

For funds with redemption fees, performance shown does not reflect the deduction of this fee which would reduce performance.

Investment options are grouped according to investment objective. Within each investment objective grouping, funds are listed in alphabetical order. For more specific information, please refer to the investments' specific disclosure information.

Performance data quoted represents past performance. Past performance is no guarantee of future results. Due to market volatility, current performance may be less or higher than the figures shown. For the most recent month-end performance information, please log onto mylife.jhrps.com or call a John Hancock representative at 800-294-3575.

Target Date										
The "target date" in a target date fund is the approximate date an investor plans to start withdrawing money. The funds generally shift to a more conservative investment mix over time. Earnings and principal value are not guaranteed at any time including the target date. Small and mid-cap stocks are often more volatile than large-cap stocks. Growth stocks may be more volatile than other stocks because they are generally more sensitive to investor perceptions and market moves. The principal risk of investing in value funds is that the price of the security may not approach its anticipated value. Foreign securities can be subject to greater risks than U.S. investments, including currency fluctuations, less liquid trading markets, greater price volatility, political and economic instability, less publicly available information, and changes in tax or currency laws or monetary policy. These risks are likely to be greater for emerging markets than in developed markets. Funds that invest in bonds are subject to interest rate risk and can lose principal value when interest rates rise. The principal value of the fund is not guaranteed at any time, including at the target date.

The cumulative effect of fees and expenses can substantially reduce the growth of your retirement savings. Visit the Department of Labor's Web site for an example showing the long-term effect of fees and expenses at http://www.dol.gov/ebsa/publications/401k_employee.html. Fees and expenses are only one of many factors to consider when you decide to invest in an option. You may also want to think about whether an investment in a particular option, along with your other investments, will help you achieve your financial goals.

Please visit mylife.jhrps.com for a glossary of investment terms relevant to this plan. The glossary is intended to help you better understand your options.

To the extent that TD Ameritrade charges these fees, the charges and amounts will be disclosed on your TD Ameritrade account statements. For more information about the description and amounts of applicable fees, please review the TD Ameritrade Commissions and Service Fees Schedule which is available for plan participants at mylife.jhrps.com.
